All comments submitted will become a part of the public hearing transcript and will be made available to the public.

Name: *(optional)* _____

Address: *(optional)* _____

With this project, VDOT proposes to rehabilitate the Route 240 (Crozet Avenue) bridge over Lickinghole Creek. Two construction alternatives were presented at the public hearing. Which alternative do you support?

Alternative A: Full road closure with detour for six months. Traffic south of the bridge will use Route 250 (Rockfish Gap Turnpike) to Route 240 (Three Notched Road) to reach Crozet Avenue. Traffic north of the bridge will reverse the detour and use Three Notched Road to Rockfish Gap Turnpike.

Alternative A, with modifications (please describe the modifications):

Alternative B: Phased construction. The bridge would be reduced to one lane and two-way traffic would be controlled by temporary signals for at least eight months. Drivers would experience delays near the bridge site especially during rush hour with this alternative.

Alternative B, with modifications (please describe the modifications):

Please provide us with any additional information that you believe will assist VDOT in developing the final design of this project.

How would you prefer to receive construction updates as they impact your travel? (please be specific)
